<https://www.linkedin.com/in/oscarfer/>

Senior Full-Stack Web Developer with 15+ years of experience building e-commerce platforms, web applications, and API integrations. Specialized in PHP, WordPress/WooCommerce, Shopify, and production systems, with hands-on experience using Python and Retool to automate operational workflows. Former development leader with experience delivering products from concept to launch. Based in Lima, Peru, and seeking remote opportunities.

EXPERIENCE

AT3 Tactical, Fullstack Developer (Contractor) — June 2023 – September 2026

Developed and maintained AT3's e-commerce ecosystem across WordPress/WooCommerce, while supporting Shopify and BigCommerce storefronts.

- Built custom features, plugins, themes, and third-party API integrations.
- Created Python and Retool tools, including a putaway application, reducing processing time across warehouse putaway and purchasing workflows by approximately 50%.
- Automated workflows with Make and supported production systems and performance improvements.

Laudato Si' Movement, Backend Developer (Contractor) — October 2022- June 2023

Delivered backend WordPress development, Salesforce integrations, and infrastructure support.

- Built and maintained Bedrock websites and managed Linux and DigitalOcean infrastructure.
- Integrated Salesforce APIs with WordPress and coordinated technical requirements with stakeholders.
- Reduced development time by approximately 30% and improved website performance by approximately 30–50%.

Limadot, Head of programming — January 2018 - March 2022

Led a team of five developers delivering complex agency projects.

- Built Shopify themes, WordPress solutions, and integrations with SAP, Salesforce, and ActiveCampaign.
- Contributed to approximately 30% faster development and 30–50% website performance improvements.

Te Recluta, Head of technology and development — February 2016 - January 2018

Led development of an applicant tracking system (ATS) from the ground up.

- Built its documented API and features for candidate sharing, report purchases, and PDF exports.
- Helped reduce hiring time by up to 80% and psychological report turnaround time by up to 90%.

SELECTED PROJECTS

OrivisDev — Independent Shopify App Developer

Built and published two Shopify apps: bAlnners – AI Image Banners and AI Product Questions & Answers.
